

NEW REPORT: Washingtonians Get Lower Health Care Costs Thanks to the Biden-Harris Administration and Democrats in Congress

The Inflation Reduction Act has lowered health care and prescription drug costs for tens of millions of Americans, with even more savings to come.

This historic legislation from the Biden-Harris administration lowers premium costs for people purchasing coverage on their own by an average of [\\$2,400 per family](#). It also lowers drug prices by capping monthly insulin costs for people on Medicare at \$35, limiting out-of-pocket prescription drug costs at \$2,000 annually, giving Medicare the power to negotiate lower drug prices, and penalizes drug companies for raising drug prices faster than inflation. President Biden, Vice President Harris, and Democrats are giving people economic breathing room and keeping families healthy.

Meanwhile, MAGA Republicans are ramping up their [war on health care](#), trying to raise costs for hardworking families and give more tax breaks to drug and insurance companies. Republican lawmakers unanimously voted against all of these policies and are working to repeal the Inflation Reduction Act altogether. Pharmaceutical companies and their Republican allies are hard at work sabotaging the law. Right now, big drug companies are in court trying to take away Medicare's power to negotiate. *Project 2025* fully repeals the Inflation Reduction Act's prescription drug provisions that are saving Americans thousands of dollars on health care. Republicans are continuing to side with drug industry lobbyists and put profits over people. MAGA Republicans also want to terminate the Affordable Care Act (ACA), slash funding for Medicare and Medicaid, and rip away protections for people with pre-existing conditions. *Project 2025* proposes overhauling Medicaid expansion and imposing onerous work requirements, time limits, and lifetime caps, eliminating mandatory benefits, and funneling Medicaid funding toward vouchers for private insurance, whose plans will be far less affordable and provide fewer benefits.

BY THE NUMBERS:

28,063 Washingtonians on Medicare who use insulin are now [saving on average](#) \$603 annually thanks to the \$35 per month insulin cap and thousands of other Washingtonians have seen their insulin prices fall thanks to Democratic investigations and policies holding pharmaceutical companies responsible for their price gouging.

156,383 Washingtonians are saving [an average](#) of \$418 on monthly health insurance [premiums](#).

344,470 Washingtonians will [save an average](#) \$412.96 thanks to the Inflation Reduction Act's \$2,000 annual out-of-pocket cost cap, effective in 2025. In 2022, 795,807 Washingtonians on Medicare but not on a low income subsidy [spent](#) an average of \$437 out-of-pocket on prescription drugs.

287,931 of Washington's seniors, 27 percent of the state's Part D population, received the shingles vaccination and other recommended vaccinations [free of cost](#) last year

1,869,420 Washingtonians on [Medicaid and CHIP](#) will maintain or gain access to expanded vaccine coverage of which around [20.5 percent](#) are Black, [36.9 percent](#) are Hispanic, and [3.4 percent](#) are Asian American or Pacific Islanders according to national averages.

THE DETAILS:

Medicare's Price Negotiation Power Will Lower Drug Costs for Over 100,000

Washingtonians. Made possible by the Inflation Reduction Act, allows Medicare to negotiate prices with drug companies for medications without generic or biosimilar options. The first ten drugs selected for negotiation were announced last year and price changes will begin in 2026. Around 144,000 Washingtonians are [currently taking](#) one or more of the ten drugs currently up for negotiation, of which around [48 percent](#) are women.

The Inflation Reduction Act Will Save Senior Washingtonians On Medicare Over \$142,251,405 Cumulatively On Prescription Drugs. The Biden-Harris administration's Inflation Reduction Act will save Washingtonians an average of \$412.96 thanks to the \$2,000 annual cost cap, which begins in January 2025. The Inflation Reduction Act also now caps monthly insulin costs at \$35 for Medicare beneficiaries, which will help 28,063 Washingtonians who rely on insulin. Right now, the Biden-Harris administration is negotiating lower prices for people with Medicare for some of the most popular and costly drugs. This is [supported](#) by over 80 percent of Americans.

Health Insurance Premiums Lowered For Over 150,000 Washingtonians. A record breaking 272,494 Washingtonians [enrolled](#) in an ACA marketplace plan in 2024, with around [52 percent](#) of enrollees being women. Last year, 156,383 Washingtonians, or 70 percent of those with an ACA plan, [received](#) enhanced premium tax credits, making their coverage more affordable and accessible, and this year that number has only [increased](#). The Inflation Reduction Act [saves](#) an average middle class family of four in Washington \$4,993 on their yearly premiums.

Coverage for Communities of Color Expanded To Address Health Care Equity. The Center on Budget Policy and Priorities estimates the increased savings under the Inflation Reduction Act will cause a sharp decline in the uninsured rate across every racial group. The extended premium savings provided in the Inflation Reduction Act have made more than [65 percent](#) of uninsured Black adults eligible for zero-dollar premium plans and [75 percent](#) eligible for plans less than \$50 a month. For uninsured Hispanic and Latino adults, now more than [68 percent](#) are eligible for zero dollar premium plans and nearly [80 percent](#) can access plans for less than \$50 a month. Health coverage access is imperative to reducing racial disparities in health coverage across the nation.

Premiums For Low-Wage Workers Eliminated. The Inflation Reduction Act ensures no Washingtonians with incomes at or below [150 percent](#) of the federal poverty level pay a premium when buying their coverage on the Marketplace.

Costs Cut For Rural America. Thanks to the provisions in the Inflation Reduction Act, roughly [65 percent](#) of rural Americans have access to zero-dollar premium health coverage and more than [76 percent](#) are able to find a plan for less than \$50 a month, narrowing the coverage differences between rural and urban America.

Over 250,000 Washingtonians Can Receive Free Shingles Vaccinations, Thanks To The Inflation Reduction Act. Thanks to the Inflation Reduction Act, 287,931 of Washington seniors are eligible for no-cost shingles vaccinations. In 2020, nearly 4 million Medicare beneficiaries received the two-part shingles vaccination. With a single shot of Shingrix costing [\\$212](#), seniors on Medicare Part D saved over \$400 on average on vaccinations in 2023. The high out-of-pocket cost of the shingles vaccine has been a key factor in low vaccination rates, especially among Black and Latino communities. This extends an important affordable preventive service to seniors on Medicare.

Better Coverage of Vaccinations For Medicaid Recipients Benefit Over 1.8 million Washingtonians. The Inflation Reduction Act also [requires](#) state Medicaid and CHIP programs to cover vaccines recommended by the CDC's Advisory Committee on Immunization Practices without out-of-pocket costs. This will allow an estimated 1,869,420 Washingtonians to gain or maintain access to no-cost shingles vaccines. More accessible vaccinations will particularly help [low-income](#) families who rely on Medicaid, many of whom are people of color and people with disabilities.

The Biden-Harris Administration Protects Washingtonians With Pre-Existing Conditions. President Biden [announced](#) executive actions to protect Americans with pre-existing conditions from junk insurance plans and surprise medical billing. Republicans in Congress are continuing to pick profits over people by passing legislation to change the rules in favor of Association Health Plans (AHPs) that [undermine](#) the ACA. AHPs are not required to have the same protections that ACA plans have. Savings in AHPs come at the expense of people with pre-existing conditions and higher health care costs.
